Nucleotide. The Nucleotide database is a collection of sequences from several sources, including GenBank, RefSeq, TPA and PDB. Genome, gene and transcript sequence data provide the foundation for biomedical research and discovery.

Bioinformatics:
Experiments ...

Bioinformatics isn't just
about storing biological
data in databases, it also
concerns conducting
experiments on that
data. Finding a database
entry you are interested

Where To Download

in is database searching, but as soon as you want to draw a conclusion from your search □ inferring homologues of a protein of interest for example □ you are conducting an experiment and need to apply the same scientific methodologies in terms of controls etc. that you would to an experiment in the laboratory.
